

CERTIFICATE OF ATTENDANCE

Respiratory Protective Equipment Fit Testing

This **30-hour training programme**, aligned with **SAQA Unit Standard 242852**, equips healthcare and allied health professionals with the essential theoretical knowledge and practical competencies required to perform **accurate, safe, and compliant respiratory fit testing** in occupational settings. The course supports effective respiratory protection programmes and promotes worker safety across a range of workplace environments.

On achieving competence, learners will be able to do the following (within their scope of practice):

- Understand the principles, purpose, and role of respiratory fit testing in workplace safety
- Differentiate between qualitative and quantitative respiratory fit testing methods
- Perform qualitative and quantitative fit tests in accordance with best-practice guidelines
- Recognise the benefits and limitations of different fit testing methods
- Identify risks, contraindications, and safety considerations associated with fit testing
- Understand the roles and responsibilities of personnel involved in the respiratory fit-testing process

Duration: 30 hours in total
EFHA CPD No: SAMA
MDB015/MPDP/071
Course CPD No.: On request prior to training
CPD (CEUs): On request prior to training
